## CAREER OBJECTIVE

Results-driven Frontend Developer skilled in Python, JavaScript, and SEO, focused on creating responsive, data-driven, and user-friendly web applications.

---

## EDUCATION

- B.Tech in Computer Science Engineering (2022–2026) – Delhi Technical Campus, GGSIPU
- Diploma in Electrical Engineering (2019–2021) – Prince Institute of Innovative Technology, BTEUP
- Senior Secondary (2017–2019) – CBSE
- Secondary (2007–2017) – CBSE

---

## INTERNSHIP

- 1) Intern – HoneyBee Digital (Sep 2025 – Present):**  
Contributed to SEO strategies to improve website visibility and local business ranking. Conducted keyword research, on-page optimization, and backlink analysis. Utilized Google Analytics and Search Console to monitor traffic and keyword growth. Collaborated with design and content teams to optimize blogs, landing pages, and meta elements. Performed off-page SEO activities such as directory submissions, social bookmarking, and competitor research.
- 2) Intern – Institute of Sound and Vibration (Nov 2023 – Apr 2024):**  
Developed Python scripts to automate vibration data collection for metro trains using loop-based triggers. Implemented real-time signal processing to extract frequency patterns and generated multiple frequency-domain visualizations for each train pass. Improved infrastructure monitoring using automated data capture and clear visual analysis for research teams.

---

## PROJECTS

- 1) Cart-Nova** *July, 2025*  
Responsive e-commerce website with futuristic UI, smooth animations, and enhanced UX (HTML, CSS, JS).  
Live - Cart-Nova
- 2) Netflix Clone.** *June, 2025*  
Modern, responsive clone of the Netflix homepage with hover effects and mobile-friendly design.  
Live - NetflixClone

---
